ABOUT

I have been programming for several years, which has given a skills set providing a very versatile profile that allows me to complete any challenge successfully.

EXPERIENCE

BeSoccer 2018 - present
Software engineer

- Working in the iOS application adding new features and optimizing the app using the latest Swift API's.
- Primarily responsible to migrate the old notification system to NodeJS using PM2 as process manager and deploying it to Google Cloud.
- Realtime data communication system using Firebase.

BeSoccer 2013 - 2018
iOS Developer

- Working on BeSoccer iOS application written in Objective-C & Swift, including WatchOS and tvOS versions.
- Helped to fit Fastlane into the project supporting by Gitlab.

CITIC 2009 - 2012
Frontend

- Making UI / UX elements using Adobe Illustrator & Photoshop for customer needs.
- I've also created scripts for front-end and back-end communication to add extra functionality to any project.
